SKILLS

- ❖ **Languages:** HTML, CSS, JavaScript
- ❖ **Frontend:** React (Vite), Tailwind CSS
- ❖ **Backend:** Node.js, Express.js
- ❖ **Database:** MongoDB, SQL
- ❖ **Authentication & Security:** JWT, OAuth 2.0, Bcrypt, AES Encryption
- ❖ **Tools:** Git, GitHub, Postman
- ❖ **Core Concepts:** REST APIs, MVC Architecture, Responsive Design, PWA, Role-Based Access Control

ABOUT ME

- ❖ Full-Stack Web Developer | Graphic Designer | Data Analytics & Data Science
- ❖ IMSC-IT Student @ JG University

EDUCATION

- ❖ **Integrated MSc in Information Technology (IMSC-IT) JG University** *Currently in 2nd Year*
- ❖ XII (GSEB) | The H.B. Kapadia New High School

Experience & Learning Journey

- ❖ **Full-Stack Web Developer | Personal Projects · Self-Learning**
 - Built responsive front-end interfaces and scalable back-end systems
 - Developed REST APIs, managed databases, and implemented authentication
 - Worked with modern frameworks and clean, maintainable code practices

ACADEMIC PROJECTS

🍏 NutriGen – Full-Stack Nutrition & Admin Management Platform

Tech Stack: MongoDB, Express.js, React (Vite), Node.js, JWT, Tailwind CSS

- Developed a full-stack MERN application with JWT-based authentication and protected routes
- Built daily meal & exercise planner with dynamic user dashboard
- Designed admin panel with user analytics, charts, and support ticket management
- Created 15+ RESTful API endpoints using modular MVC architecture
- Implemented MongoDB schema design with data seeding for testing
- Integrated PWA support with service worker for installable web experience
- Structured scalable backend with controllers, services, and middleware separation
- GitHub: [Link](#)
- Live Demo: [Link](#)

🔒 SecureGen – Encrypted Password Vault & Generator

Tech Stack: MongoDB, Express.js, React, Node.js, JWT, AES-256, Bcrypt, Passport.js

- Built encrypted password vault using AES-256 encryption for stored credentials
- Implemented JWT authentication with HTTP-only cookies and secure middleware
- Integrated Google OAuth 2.0 using Passport.js
- Developed customizable password generator with real-time strength indicator
- Designed responsive UI with dark/light theme toggle
- Implemented full CRUD operations with protected API endpoints
- Followed secure coding practices with environment variable management
- GitHub: [Link](#)
- Live Demo: [Link](#)

ACHIEVEMENTS / HOBBIES

- Built and deployed multiple full-stack MERN applications
- Implemented secure authentication and encryption systems
- Strong hands-on experience in modular backend architecture
- Consistently build real-world projects to strengthen engineering fundamentals
